### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Manabu Kanesaka on 11/15/04.

The application has been amended as follows:

On line 23 of claim 10, "using triangulation of light" has been added after "receiving plane".

### ***Reasons for Allowance***

Claims 1-10 and 14-16 allowed.

Claims 1-6, 10 and 14-15 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 7-9 and 11-13, directed to the species of A and C no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The following is an examiner's statement of reasons for allowance:

As to claims 1-10 and 14-15 the prior of record, taken alone or in combination, fails to disclose or render obvious an apparatus for measuring displacement comprising a lens array composed of plural condenser lenses having a uniform image formation characteristic around an optical axis and arranged in a scanning direction of the radiated light for converging the measuring beams reflected at the irradiation point, an imaging lens having a uniform image formation characteristic around an optical axis thereof for converging the measuring beams passing through the lens array to form the image formation point on the light receiving plane so that an amount of the displacement on the surface of the measuring object is obtained using triangulation of light, in combination with the rest of the limitations of claims 1 and 10.

As to claims 16, the prior of record, taken alone or in combination, fails to disclose or render obvious an apparatus for measuring displacement comprising a lens array composed of plural condenser lenses and arranged in a line for converging the light reflected from the surface of the measuring object at a second angle relative to the surface different from the first angle, an imaging lens for converging the light from the lens array unto a light receiving element so that an amount of displacement is measured using triangulation of light.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

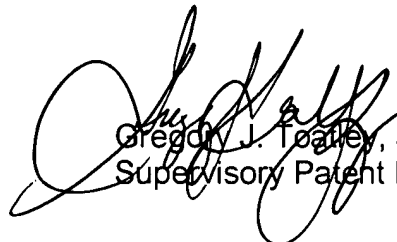

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amanda H Merlino whose telephone number is 571-272-2421. The examiner can normally be reached on Monday and Thursday.
